

PAINTING SCHEMES CATALOGUE 2005

Katalog vnějších nátěrů letounů EV-97 teamEurostar a SportStar

V katalogu jsou uplatněny následující principy:

- ❖ viditelné barvy ve skicách jsou pouze informativní, závazné barvy jsou definovány ve stupnici RAL v záhlaví,
- ❖ za definicí dle RAL je pak doplňková definice odstínu fólie („fólie ORACAL“) pro řezanou lepenou grafiku (pokud je použita); odstín fólie nemusí být zcela shodný s odstínem barvy RAL – zejména u barev „metallic“ nemusí být použity metalické fólie
- ❖ pokud je před označením barvy v RAL použito symbolu R-55/ označuje to barvu provedenou pomocí dvouvrstvého systému pro metalické barvy (barva + čirý lak); v názvu barvy je označení „metallic“
- ❖ pokud je ze názvem barvy uvedena fólie (před označením barvy v RAL), je v této barvě použita pouze řezaná grafika z lepených fólií; následná definice v RAL je pouze informativní
- ❖ uvedené hmotnosti jsou průměrné (tolerance +10/-15%); skutečné hmotnosti se mohou lišit dle použitého odstínu
- ❖ symbol GD označuje autorská provedení s příplatkem za návrh
- ❖ v provedení STANDARD je použito pouze nemetalických barev
- ❖ v provedení 1/2 METALIC jsou použity metalické odstíny na nemetalické celkové barvě
- ❖ v provedení 1/1 METALIC jsou všechny barvy metalické

Painting schemes catalogue of EV-97 teamEurostar and SportStar

The catalogue has been prepared on the following basic principles:

- ❖ used colors are just for information and binding proposal shall be based on RAL color index
- ❖ RAL color index is followed by complementary color of ORACAL foil for special supplementary design, if used; color shade of plastic foil not have to conform RAL color - especially if frosted paint (metallic) is used and appropriate foils are not available
- ❖ if RAL color index contains prefix R-55/... then two-coated painting system (frosted paint) is used (color + clear varnish); “metallic” is used in name of paint code
- ❖ if paint code is followed by foil (before RAL color index) then design is made from foils only; consecutive RAL color index is informative only
- ❖ weight information is average with process tolerance +10/-15% and reflects exact colors and scheme
- ❖ GD symbol represents Glogerhanz Design with extra cost for copyright
- ❖ STANDARD painting version use non-frosted paint only
- ❖ 1/2 METALLIC version means that frosted paint is used on non-frosted basis
- ❖ 1/1 METALLIC version means that frosted paint is used only

ORDER CONDITIONS:

- ❖ **price of specific scheme corresponds to valid price list**
- ❖ **changes of RAL color index is free of charge**
- ❖ **any modification of presented designs are subject of extra cost based on valid price list**
- ❖ **painting cost of modified design shall be agreed separately accordance with actual cost**
